Many thanks to Sverre for getting me back into the swing of things. – Sverre Morlandson. Civil War - Strategy - General | Strategy Wiki | FANDOM Powered by Wikia The Roman Empire was one of the greatest and most important of the ancient civilizations. Its power spread across Europe, North Africa and to parts of Asia. Its demise in the 4th century, brought about by a combination of several factors, including internal division, barbarian attacks, and external invasion, saw the end of one of the greatest empires in the ancient world, leaving in its wake great uncertainty. These are the best general strategy games in the world, and are, in fact, rather highly ranked on Steam. The strategic approach is vital for the success of any civilization. Civilizations that are too small or weak can't afford to invade other civilizations or can't be supported by them. That means we have to be careful. With a smaller army we are often more prone to attack. Such movements can easily backfire. But we

shouldn't overdo it. Civilizations are never known to act too aggressively when they are at their peak. That would be suicidal. The strength of a civilization is not measured by its army size. The size of a civilization is rather measured by its resources and its infrastructure. It has been observed that civilizations that have more resources and more buildings than their neighbors generally reach the top sooner than civilizations that don't have these things. But what exactly is a civilization? How is it formed? How can we measure it? What factors determine its growth? Let's find out.
